

# Mimicking Persuasive Conversational Dynamics with Language Models

Alex Lyman, Sam Vance,  
Rylee Albrecht

# Large Language Models

- Language has a probability distribution (Firth 1957)
- Probability distributions can be modeled
- Transformer (Vaswani et al 2017)
- Self-Attention

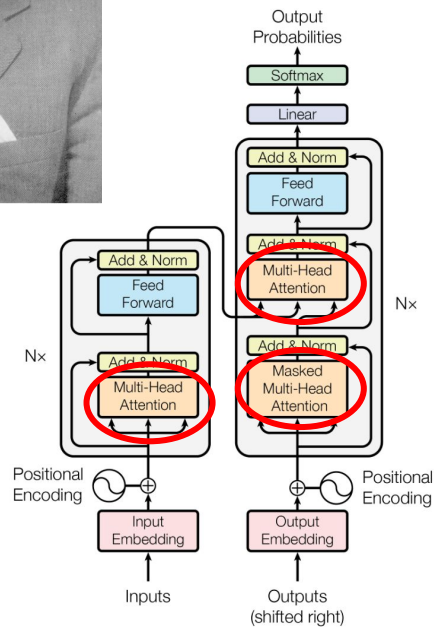

Figure 1: The Transformer - model architecture.

# Large Language Models (LLMs)

- ChatGPT
- Pretrain, Finetune, Align
- Proliferation of models in size, count, capability
- Instruction-following abilities
- Prompt for desired results

Image courtesy of HuggingFace

# LLMs as People

- LLMs can simulate people in political contexts
- Demographic information helps
- Algorithmic fidelity
- Accessing model information can be hard
- How well can LLMs replicate other tasks like persuasion?

# Persuasion For Good

- **Participants**

- 2000 Crowd Workers
- Roles: Persuader, Persuadee

- **Task**

- Persuader: Convince persuadee to donate up to \$2
- Persuadee: Decide whether or not to donate based on conversation with persuader
- Limit to 20 conversational turns

- **Objective**

- Identify most effective persuasion strategies

# Persuasion For Good Task Example

**Persuader**

I've donated reguarly, most of the time I wish I could do more but even the smallest amounts help.... even pennies add up if there's enough :)

**Persuadee**

I would think about donating something at some point.

# LLM Persuasion For Good

- **Participants**

- GPT-4
- Roles: Persuader, Persuadee

- **Task**

- Persuader: Convince persuadee to donate up to \$2
- Persuadee: Decide whether or not to donate based on conversation with persuader

- **Objective**

- Show that LLMs can replicate human persuasion dynamics
- Metric of Success: Similarity between simulated donations and human donations

# Initial Prompting Example

**Persuader**

That's wonderful to hear! Thank you for choosing to contribute. May I know how much of your earnings you'd like to donate to Save the Children?

**Persuadee**

I'd be happy to donate half of my earnings, or \$1, to Save the Children. I hope it can contribute to their remarkable efforts in supporting children all around the world. Please let me know how I can proceed with the donation.

# Final Prompting Example

**Persuader**

There are millions of Syrian children facing daily threats of violence. Your small donation can help these children find safety.

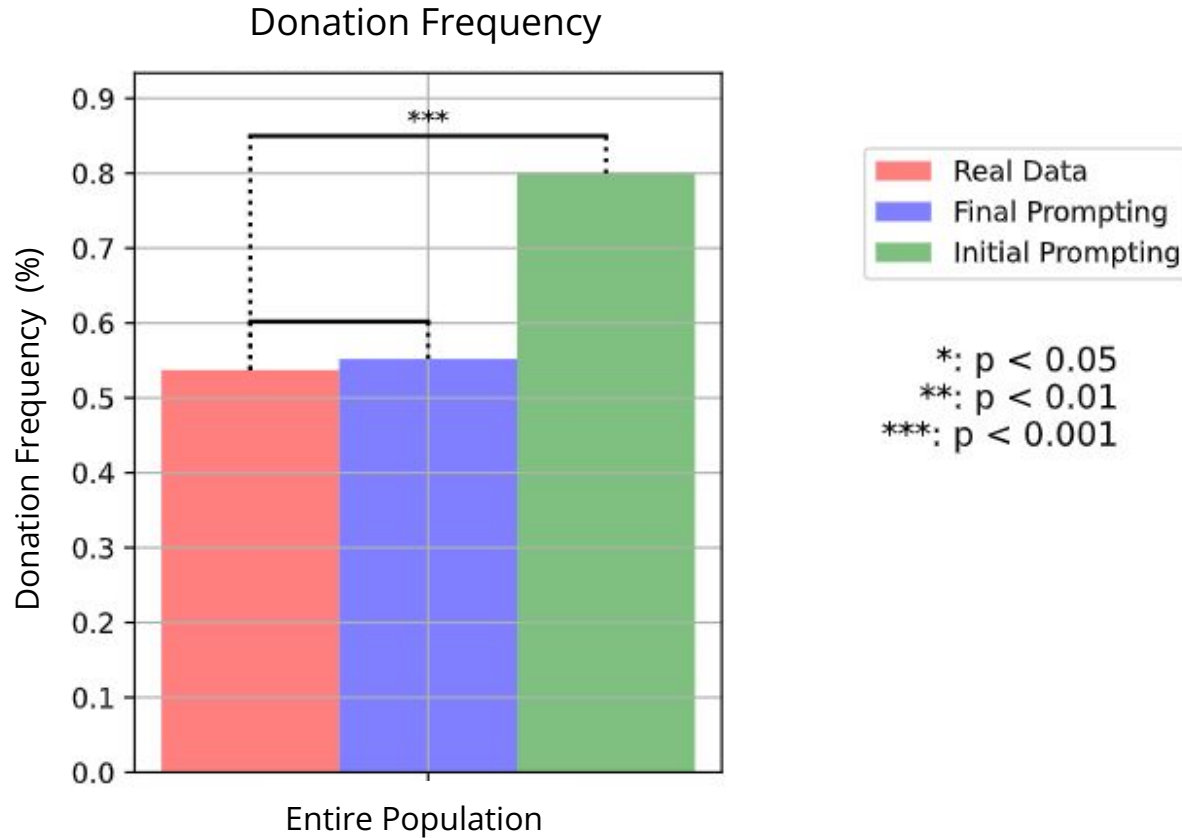

**Persuadee**

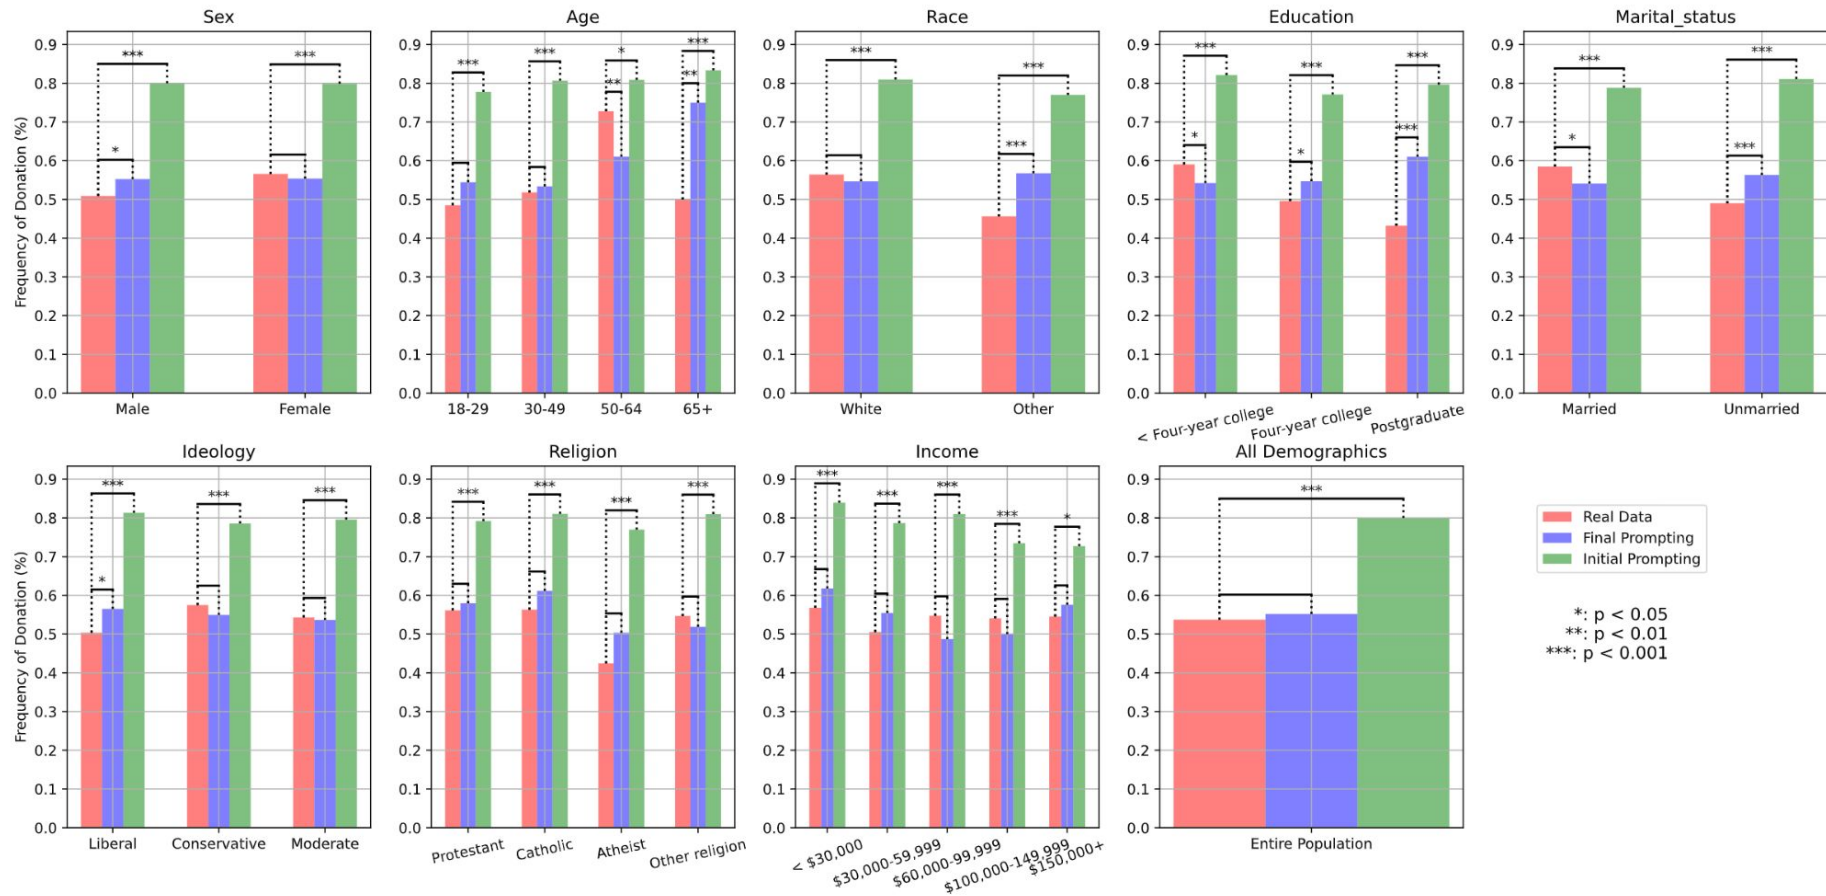

It's heartbreaking to hear about the situation in Syria. I really wish I could help more. I'll consider donating a small portion.

# Results

# Distribution of Donations

# Differences Between Initial and Final Prompting

- Changed donation collection
- Instructions
  - Keep responses concise
  - Donating is not required
  - 100% is not a lot of money
- Add demographics for persuadee

# Future Research

- How far do these capabilities go?
- Camp Site Negotiations
  - 1000 negotiations
  - 3 firewood, 3 food, 3 water

# Why is this important?

- Prompt engineering is important
- Real-world applications
  - Practice persuasion strategies
  - Market research
  - Political microtargeting
